

## **Progression in Geography – Sheering C. of E. Primary School**

***‘Geography underpins a lifelong ‘conversation’ about the earth as the home of humankind.’  
Geographical Association***

### **INTENT**

At Sheering Primary School our Geography curriculum is designed to develop children’s curiosity and fascination about the world and its people: developing children and their role as global citizens as well as inspiring them to become happy and lifelong learners.

Children investigate a range of places to help develop their knowledge and understanding of the Earth’s physical and human processes, including the heritage within their local community, the wider area of Britain and other Countries across the World. We are committed to providing children with opportunities to investigate, be curious and enquire about their locality of Sheering so that they can develop a real sense of who they are, their heritage and what makes our local area unique and special. We also aim to develop the children’s ability to apply geographical skills to enable them to confidently communicate their findings and geographical understanding to a range of audiences.

#### **Key Features and Expectations**

Key Features:

- TTS World map with grid references displayed in every classroom
- Whole school Geography display board showcasing learning taking place in classes
- Relevant curriculum information linked to the map with meaningful references throughout the topic
- Different strands of geographical knowledge, locational and place, Human and Physical features, enquiry, map skills, field work skills
- Key vocabulary is highlighted and explicitly taught within the lesson
- Recapping of prior knowledge
- Pre and post learning tasks or enquiry questions
- Regular visits to local area to enhance and develop practical field work skills for all children
- KS1 participate in weekly Explorer sessions off site utilising the local area, transferring and applying skills learnt in class

Expectations:

- Geography is taught weekly in the Spring term
- A smaller unit of cross-curricular topic (maths) work is taught in the Summer term
- Field work skills are explicitly taught (atlases, compasses, digital maps, OS maps, globes)
- Each lesson has the long date and a learning question written or labelled in their books which is the focus of the lesson
- Learning is recorded in many different ways; topic book; photographic evidence (tapestry); use of art; digital technology; mathematical evidence
- Termly assessments identifying whether children have not met, met or exceeded the expected standard, this is then used to inform future planning

**EYFS links:*****Understanding of the World******Reception***

- Draw information from a simple map.
- Recognise some similarities and differences between life in this country and life in other countries
- Explore the natural world around them
- Describe what they see, hear and feel whilst outside
- Recognise some environments that are different to the one in which they live
- Understand the effect of changing seasons on the natural world around them

***The Natural World ELG***

- Explore the natural world around them, making observations and drawing pictures of animals and plants.
- Know some similarities & differences between the natural world around them and contrasting environments, drawing on their experiences & what has been read in class.
- Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter

***People, Culture and Communities ELG***

- Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from, when appropriate, maps

<b>National Curriculum</b>	
<b>KS1</b>	<b>KS2</b>
<p>Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first hand observation, to enhance their locational awareness.</p> <p>Locational knowledge</p> <ul style="list-style-type: none"> <li>• Name and locate the world's seven continents and five oceans</li> <li>• Name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and surrounding seas</li> </ul> <p>Place knowledge</p> <ul style="list-style-type: none"> <li>• Understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country</li> </ul> <p>Human and physical geography</p> <ul style="list-style-type: none"> <li>• identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles</li> <li>• use basic geographical vocabulary to refer to: key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop</li> </ul> <p>Geographical skills and fieldwork</p> <ul style="list-style-type: none"> <li>• use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage</li> </ul>	<p>Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.</p> <p>Pupils should be taught to:</p> <p>Locational knowledge</p> <ul style="list-style-type: none"> <li>• locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities</li> <li>• name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time</li> <li>• identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)</li> </ul> <p>Place knowledge</p> <ul style="list-style-type: none"> <li>• understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America</li> </ul>

<ul style="list-style-type: none"> <li>• use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map Geography – key stages 1 and 2 3</li> <li>• use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key</li> <li>• use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.</li> </ul>	<p>Human and physical geography</p> <ul style="list-style-type: none"> <li>• describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water</li> </ul> <p>Geographical skills and fieldwork</p> <ul style="list-style-type: none"> <li>• use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied</li> <li>• use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world</li> <li>• use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.</li> </ul>
